

Cybersecurity Solutions

Respond

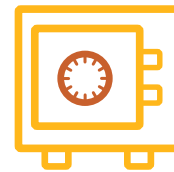

Sure's comprehensive security portfolio aligns closely with the National Cyber Security Centre and Guernsey Financial Services Commission Cyber Security Rules. This ensures that we can help you to be more compliant with regulation and create a safer environment for your critical business data.

The compliance framework comprises five focus areas for business cyber-security. In the respond phase we ensure that there is a plan in place which mitigates the disruption caused by a cyber-security event.

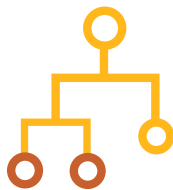

Digital Incident Response

In the event of a security compromise or breach, this service ensures that you can quickly implement the actions required to react to an attack.

Containment & Mitigation

In the event of a cyber-security incident our experts can be on-hand to stop the current threat and take action to prevent recurrence.

Incident Management Planning

This service enables your business to have a strategy and plan in readiness for when an incident occurs. It includes training, tabletop exercises and data exposure investigations.

Managed Networks & Security

Sure's Managed Network Service relieves the burden of 24x7 network management and also ensures that in the event of a network security incident, emergency remedial action can be taken by our expert team.

Advisory & Design

At Sure we have a team of specialist consultants with extensive expertise in cyber-security solutions. We can help you audit your infrastructure and processes, identify risks and vulnerabilities and implement robust security systems and policies. Ask your account manager how Sure's Advisory & Design Services can help with your cyber-security needs.
