

PRODUCT SOLUTIONS

Internet connectivity GUERNSEY

Internet access is a vital component of modern business communications. Sure International offers a range of internet services from corporate broadband through to our dedicated, highly resilient and un-contended IP Feed product.

Key features

- Scalability, you can choose the right size solution to meet your business needs
- Reliability, guaranteed SLA's and uptime
- Flexibility, fixed and variable charging, with burstable options for IP Feed
- Resilience, provided over a carrier class network
- Capacity, offering you a range of connection speeds from 2Mb/s up to multiple 1Gb/s

Internet Connectivity

Connectivity options

Broadband Pro

Do you run a small business or are you an experienced user who just needs a lower contention and/or a fixed IP address. Do you regularly download/upload very large files and need to do it quicker?

Perhaps you need to build a small network and need each terminal to have a fast Internet connection. Whether it's for smooth browsing, quick downloads or faster communication with your customers, you need Broadband Pro.

The service offers download speeds of up to 40mb/s and an upload speed of up to 2Mb/s with a 10:1 contention ratio.

IP Feed

IP Feed offers an un-contended, scalable and highly resilient internet service delivered over a private circuit connection from your business premises.

About the IP Feed service

IP Feed provides a permanently connected Internet connection that is dedicated exclusively for your use. It provides constant high capacity access to the Internet supporting your businesses connectivity and e-business requirements.

Key Benefits

Scalability:

- Bandwidth is available from 2Mb/s up to multiple 1Gb/s connections allowing you to increase capacity as your business needs develop.

Reliability:

- You will have the peace of mind of dealing with an experienced, international Internet solutions company. Your IP Feed is connected to the rest of the world through a highly resilient Internet Backbone ensuring the highest reliability.

Flexibility:

IP Feed can be delivered and charged to you in two different methods:

- Fixed bandwidth Gives you unlimited Internet connectivity at a set bandwidth at a fixed cost per month. This option gives you control over your communication costs and allows you to easily manage your operating budget.
- 'Burstable' bandwidth This alternative configuration allows your Internet service to 'burst' providing additional bandwidth above and beyond the rate you have committed to when your business requires. This ensures that during peak or unexpected periods of high activity your business is not constrained by a fixed bandwidth limit. Use in excess of your fixed bandwidth limit is calculated on a monthly basis, and you only pay for the additional amount you have used.

Resilience:

- Sure's internet services are connected to several global backbone providers over the HUGO cable network, giving us direct connectivity with more than 70 countries, making this one of the most reliable and extensive IP networks in the world. Our security standards include Cisco Powered Network designation for IP services.

Capacity:

- We can support your business service speeds from 2Mb/s to multiple 1Gb/s services.
