

# vCloud Pay As You Go (PAYG)

## vCloud Pay As You Go (PAYG)

Cloud PAYG ensures that you only pay for the computing resources you provision and configure on demand, paying monthly for the resources you have consumed in the preceding month. It provides complete flexibility over your environment using an advanced web-portal – or ‘single pane of glass’ through which you provision and access your Cloud resources allowing you to scale both up and down as and when your business needs dictate. It is ideal for test and development environments and can dramatically reduce disaster recovery costs.

With our vCloud PAYG you control what you use and when you use it without having the expense of paying for hardware when it’s not required\*. You pay by the hour for the virtual CPU, memory and disk consumed. It enables you to take advantage of the latest development in server and software technology to give you access to an on-demand computing model.

### **vCloud PAYG provides:**

- a virtual infrastructure that can be changed dynamically at anytime
- immediate scalability allowing you to add and remove resources as and when you need them
- cost savings by eliminating unnecessary capital expenditure
- flexibility readily accommodating the ‘burstable’ nature of dynamic workloads and unplanned peaks
- a cost effective and transparent service

\*A small service access fee is charged on a monthly basis. \*\*Additional charges apply

## Features

- Hourly billing for vCPU, memory and disk resources
- Ability to create and delete resources, up to your allocated disk space
- vCPU, memory and disk usage payable in arrears
- 1-month contract term
- Optional SPLA licenses\*\*
- Additional services available i.e. bandwidth, backups\*\*

## Microsoft licensing

If you plan to use any Microsoft Operating Systems or server applications such as SQL Server, Exchange, SharePoint or Lync, on our Infrastructure as a Service platform, Microsoft require that this software is licensed under the Service Provider License Agreement (SPLA) model (with the exception of server applications that you have active Software Assurance (SA) on). We can provide you with Microsoft SPLA licensing on a monthly basis if required.
