Microsoft 365 Backup

Overview

Backing up your Microsoft 365 data using the Sure Microsoft 365 backup provides a critical extra layer of protection against data loss, enabling recovery from user errors. The service delivers immutable long-term backup, archiving and recovery of critical information, guarding against ransomware while maintaining compliance with retention policies.

Business Challenges

The widespread adoption of Microsoft 365 applications has delivered significant benefits to businesses of all sizes. But has generated a range of challenges that need to be addressed to prevent data loss and ensure security.

Technical Skills Deficit

Organisations do not always have the skills to deploy solutions in house.

Capital investment

Implementing in-house solutions can be costly.

Support

Ensuring that you have the appropriate technical support to protect and recover your critical data.

Data Loss Protection

Protect against accidental deletion of valuable data.

Compliance

Fully compliant Microsoft 365 back up solution.

Ransomware Protection

Immutable storage ensures robust ransomware protection.

User Error

Defends against accidental data modification.

Long Term Archiving

Keep archives of your data over many years for historical analysis or reference purposes.

Microsoft 365 Backup Solution

A comprehensive solution allowing you to protect and restore your Microsoft 365 organisations, including Microsoft Exchange, SharePoint, OneDrive for Business and Teams data.

Support when you need it

Technical resources available on demand.

Meet regulatory challenges

An online backup copy and separate immutable copy of your data held within Sure's Data Centres in the Channel Islands.

Cost Effective

Pay as you go solution, charges are per user and for the amount of data stored.

Market leading technology

Best of breed technologies including Veeam Backup for Microsoft 365 and Cloudian immutable S3 storage, securely deployed in Sure Data Centres.

Awareness Training

- Data durability is rated at 99.999999999%.
- The solution is deployed in Sure's Data Centres, which have resilient network, power, cooling.
- Every data storage component within the technology is minimum of N+1, with data being N+1 across the Channel Islands.
- Immutability ensures that your data is tamper proof.
- Sure's hosting services are ISO 27001 and ISO22301 certified, the benchmark for information security and business continuity.

Replica Availability Zones

The backup copy and immutable copy of your data is held in geographically separate availability zones.

Web Portal and APIs

Our cutting-edge (HTML5) cloud portal gives you access to real-time backup and restore metrics, as well as giving you the capability to set up backup and restore tasks.

100% Uptime

The service is ideally suited to Enterprise businesses who cannot tolerate downtime for any given service.

Data Encryption

Data is protected both in transit and at rest to AES-256. The immutable copy of data has layers of protection to ensure the data is tamper proof, ensuring ransomware protection.

Advisory & Design

At Sure Business we have a team of specialist consultants with extensive expertise in Microsoft365 solutions. We can help you design and implement IT solutions at scale, identify risks deploy comprehensive backup solutions to ensure that you never lose critical data.
