

# Top 5 benefits of using the Sure network

Delivering outstanding connectivity for our business customers

1

## Cloud access

Our next generation network gives you high speed access to AWS and MS Azure delivering superior application performance, availability and security wherever you are.

## Hybrid working

Our agile network and innovative digital workplace tools provide an ideal platform for your remote working solutions.

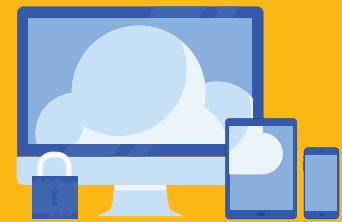

2

3

## Global reach

Our high speed network connects our communities and brings world-class global connectivity to our businesses customers.

4

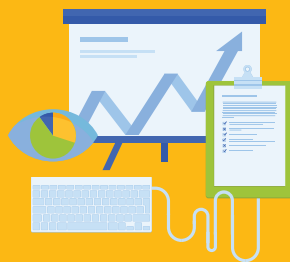

## Security

We offer a comprehensive suite of on-island cybersecurity solutions that help you protect your brand, safeguard your domain and secure your email.

5

## Reliability

Our diversely routed network, 24x7 monitoring and proactive service capability ensure that your connectivity is always there when you need it.

**Our resilient network is at the heart of everything we do. We constantly invest in our connectivity, so that you can benefit from high-speed access to our innovative products and services**
